

AQUNA
Sustainable Murray Cod

THIS IS AQUNA SUSTAINABLE MURRAY COD

Premium, sustainably-farmed Murray cod with a great-tasting natural, creamy flavour.

An iconic Australian freshwater fish, our Murray cod is pond-grown in the fish's native environment. You'll love our environmentally-conscious ethos that brings together science and sustainable practices to produce a luxury fish product.

Winner of Smoked Product & Fresh Fish Classes

2019 Winner of Excellence in Sustainability

2019 Winner of Business of the Year

Ask for Aquna and experience our award-winning Murray cod:

Sustainably-farmed.

Our high-quality Murray cod is sustainably-farmed in open ponds (or dams) on the Murray-Darling Basin river system – the fish's native environment. Fully traceable from pond to plate, we're always looking for new ways to have a positive impact on people's plates and the planet.

Produced in regional Australia.

Our Murray cod is produced in the Riverina's Murray-Darling Basin by Australian growers, harvested and in-market within 24 hours.

Great-tasting.

With a delicate, clean flavour and firm texture, Aquna Sustainable Murray Cod is a great-tasting fish featuring incredible, crispy skin when pan fried.

Consistent supply.

At Aquna, we harvest each week to produce a reliable, consistent and ongoing supply of Murray cod to chefs and consumers.

Versatile.

Perfect in all recipe styles, Aquna Sustainable Murray Cod holds together well no matter how it's cooked – pan fry, grill, barbecue, roast and steam.

Socials.

Join our Aquna Sustainable Murray Cod community!
